ABSTRACT

The purpose of the guide is to assist faculty in the implementation of the concept of career education in grades K-6 of the Muscatine (Iowa) Community Schools. The guide begins with an outline of the philosophy and goals of career awareness and tables listing learning activities for an instructional sequence emphasizing self-awareness followed by occupational awareness. The major portion of the document presents suggested objectives, activities, resource materials, and methods for integrating the career education program into the curriculum, arranged by grade level. Objectives and activities, ranging from role playing to written reports, grow increasingly sophisticated. Supplemental materials include letter forms, field trip guides, interview tips, bulletin board suggestions, career games, and other activities to help implement self- and career awareness. Locally available career education books and audiovisual materials and recommended additional resources are listed. Concluding the document are a long range plan for career awareness extending through 1977, a career education assessment guide, and a glossary. (Author/NH)

PREFACE

Dr. Sydney Marland, Jr., commissioner of education in the early 1970's, challenged the educators of this nation to invent career education. This guide summarizes concepts people in this district have shared as career education is invented in Muscatine.

The purpose of this guide is to assist the faculty in this district as we implement and coordinate our concept of career education. The activities described in the grade-level section are examples and are included so they can be reviewed and tried. Teachers are encouraged to pick and choose, to try those activities which seem applicable, and to develop additional activities using patterns established in this guide. We sincerely hope that the guide will provide a springboard for spontaneous incorporation of career awareness concepts in all phases of the instructional program.

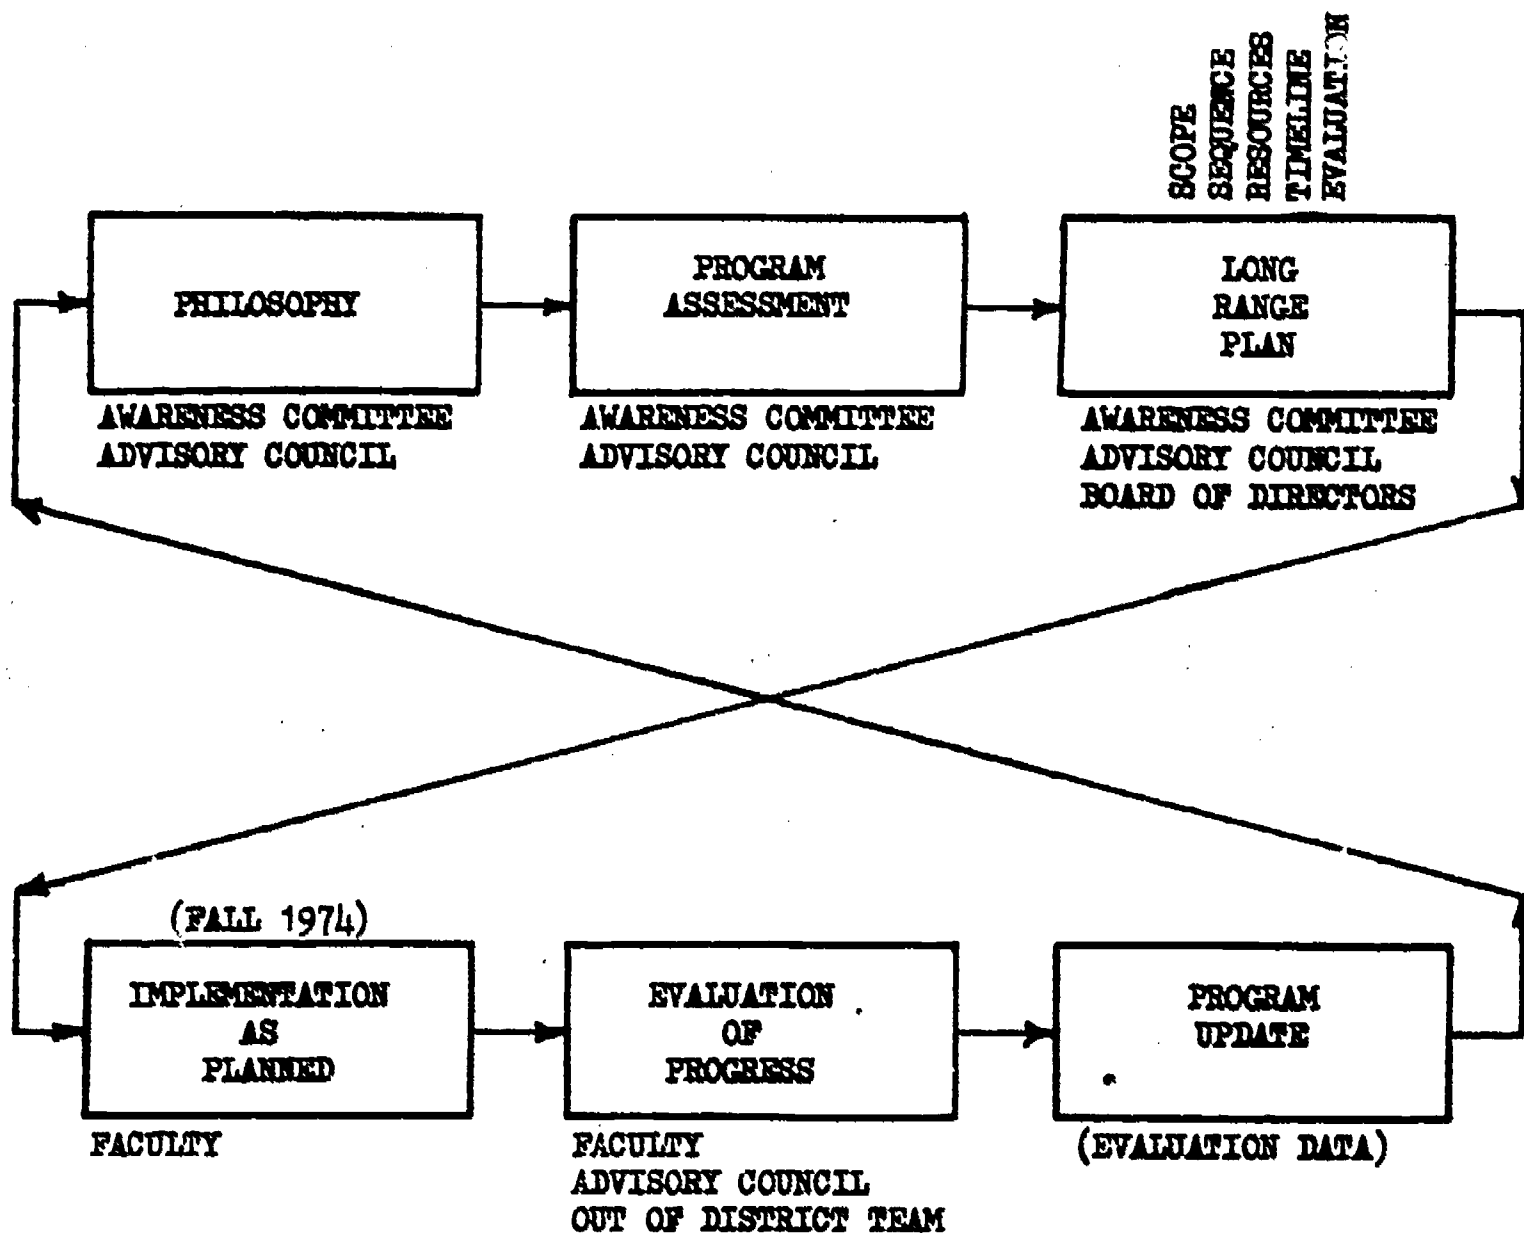

Our faculty is encouraged to become familiar with all parts of this guide. The white pages give an overview of the career awareness program, and the colored pages identify activities which are oriented to specific grade levels.

Planning of the career awareness program followed the format depicted by the chart on page iv. The long range plan on pages 236 through 239 explains the progress we expect to make during the next three years, and the assessment guide in the last section is the instrument with which we will appraise the extent of our success. Evaluation space is also provided for your own notes on each of the grade-level activities. Your comments and suggestions for improvement of this guide or any phase of the career awareness program will be welcomed by either the career awareness committee representative in your building or the Director of Career Education, (phone 263-7223).

Our thanks are extended to the many people who assisted in the preparation of this document, and to the Davenport Community Schools and Des Moines Community Schools for permitting us to incorporate materials from their awareness guides.

The Summer Workshop Subcommittee

CAREER AWARENESS PLANNING PROCESS

CAREER EDUCATION IN MUSCATINE COMMUNITY SCHOOLS

In early American society, formal education was viewed primarily as a means of imparting knowledge. Career education occurred as children worked beside their parents in small shops and on the land. The number of different occupations was limited and the opportunities for choice few. But as technology improved and the country moved from an agrarian to an industrial and urban society, parents found it more difficult to counsel their child in the choice of a future occupation.

American schools have traditionally operated under the assumption that academically oriented school room education will automatically lead to the ability to work productively. While the basic skills taught by the school are needed by all individuals as they enter productive life, education has come to mean much more.

Career education compels educators to establish a renewed perspective toward the educational process. Schools must provide not only the career education represented by preparation for college and eventual work in a profession, but also for the 80% of the occupations in this nation which do not require a baccalaureate degree. Educators must examine the existing instructional programs and incorporate experiences which will enable students to systematically (1) gain an understanding of themselves, (2) become aware of basic facts about a variety of occupations, (3) explore or experiment with several occupations in which they are interested, and (4) receive occupational preparation that will enable them to be employed in one of several occupations within a career cluster of their choice.

Compilation of this guide is one of many efforts our district has, and will continue to commit toward the goal of providing relevant and up-to-date learning experiences for our students. A society that has put man on the moon is challenging our educational system to demonstrate similar excellence. We must meet, even exceed the challenge.

Dr. Russell N. Ward
Superintendent of Schools

CAREER AWARENESS PHILOSOPHY

Career Awareness relates the world of learning with the world of work. It first entails self-awareness; then awareness of others in the immediate environment; and continues to expand to include a more comprehensive awareness of the total community environment. Career Awareness includes the development of a value system which incorporates a knowledge of, and an appreciation for, the role of work of all types in our society. Life and learning are dynamic processes that occur in the home, the community, and in all environments, including the classroom.

CAREER AWARENESS GOALS

I. Principal goals (Student Outcomes)

A. Self Awareness

1. The students will develop an understanding of their freedom, as individuals, to hope and to change.
2. Each student will develop an understanding of his own rights to his feelings and opinions as they differ from the feelings and opinions of others.
3. Each student will develop an understanding of his obligation to respect the feelings and opinions of other.
4. The student will develop a positive self-image by identifying ways in which each is a distinct individual.
5. Each student will develop an understanding of his abilities.
6. Each student will develop an awareness of himself physically, mentally, and emotionally.

B. Occupational Awareness

1. The student will develop an understanding that all legitimate occupations are worthwhile and honorable.
2. The student will develop an understanding that rapid changes taking place in the world of work will necessitate advanced specialized training because jobs expand, change, and even disappear according to the needs of society.
3. The student will develop an awareness of the world of work, through responsibilities at school and home.
4. The students will be motivated to become a part of the world of work.

II. Related Goals

A. Understanding of Career Awareness

1. Faculty will understand the purpose and implementation procedures.
2. Parents will understand the purpose and how their child will benefit.
3. Our community will understand how they will benefit and how they can help.

B. Community Involvement

1. Resource people will be utilized.
2. Public relations will be stressed.
3. Field trips and other activities in the community will increase.

C. Integrate career awareness concepts into existing curriculum.

INSTRUCTIONAL SEQUENCE

Career Awareness emphasizes self awareness (self understanding) in the primary grades and expands to include increasing awareness about occupations in the intermediate grades. The tables on pages 4 through 10 list learning activities which many teachers indicate are already a part of our program (as indicated by a districtwide survey at the various grade levels). Teachers are urged to see that the items listed in the tables are covered at the grade levels indicated.

SELF AWARENESS SEQUENCE

Primary Grades	Intermediate Grades
<p>The learner will become aware of her or his unique physical, intellectual, emotional, and social capabilities, and more specifically will become aware of her or his:</p> <ol style="list-style-type: none"> 1. Personal interests 2. Progress in mental and creative abilities 3. Physical characteristics 4. Acquisition of short-term personal goals 5. Feelings of and about self, peers, adults, and near environment 6. Understanding that human beings are more alike than different 7. Opportunity to select peer groups 8. Knowledge that societal institutions influence personal attitudes and biases <ol style="list-style-type: none"> a. The role of the family b. The school c. The community 9. Responsibility to behave appropriately in the school setting 10. Benefit from personal growth in the educational setting 11. Decision-making processes 	<p>The learner will relate self preception with the world of work and will :</p> <ol style="list-style-type: none"> 1. Realize how self-concept is related to interactions with others 2. Analyze interests as a basis for developing new interests 3. Recognize personal mental and creative abilities in terms of an evolving life style 4. Recognize physical abilities 5. Appraise others' perception of self and cope with praise or criticism in a positive manner 6. Relate successfully with various peer groups 7. Investigate similarities and differences in cultural values <ol style="list-style-type: none"> a. Recognize that all cultures are to be respected b. Recognize that what is acceptable in one culture may be rejected in another 8. Observe that the educational setting can help develop life skills 9. Learn to behave appropriately in the community setting

Primary Grades	Intermediate Grades
<p>12. Concept of work</p> <ol style="list-style-type: none"> Difference between employer and employee Dignity of the individual Variety of occupations available Why people work Relationship between income and lifestyle Workers are paid for services <p>13. ACTIVITIES SECTION

The following activities, teaching techniques, and resources are suggestions for implementing the Career Awareness program. These are but a few of the possible approaches. Space is provided at the edge of each sheet for your evaluation or other notes. Blank pages are provided at the end of each grade level section so you can enter activities of your own design. The purpose for listing these activities is to provide examples that will stimulate your thinking about methods of using career concepts to convey practical applications of basic skills into all curricular areas.

Plan to try several of the activities suggested for the grade level you teach. Then discuss your reaction to these activities with the career awareness committee representative from your building (or call the Director of Career Education at 263-7223). Your suggestions for improvement of these units and addition of others is actively solicited.

Teachers who develop additional units are encouraged to submit them to the career awareness committee for review. Each month one of these ideas will be included in a career education newsletter which will be prepared by the Director of Career Education and distributed to faculty in this district. The present Director of Career Education has promised a steak dinner to the teacher (and the teacher's spouse) who submits the most outstanding unit as judged by a team composed of advisory council representatives, principals, and career awareness members.

Additional copies may be made of any of the materials in this guide. If printing is a problem check with the Director of Career Education for assistance.

The student will become more aware of self

Suggested Activities for Kindergarten

BEST COPY AVAILABLE

Resource Materials

Integration into the Curriculum

1. Make "Me" books illustrating the student's:

- a. Home
- b. Family
- c. Pet
- d. Special friend
- e. Relatives (aunt, uncle, etc.)
- f. Mother's work
- g. Father's work
- h. Favorite toy
- i. Favorite game
- j. Favorite book
- k. Favorite food
- l. Favorite color

Could be grouped
on page,

"My Favorite Things"

The students will become more aware that they are members of the community.

Kindergarten

Integration into the Curriculum

1. Discuss helpers in the community and our role in the community.
2. Make a display of "Our Community". Draw in the streets. Have students make their houses and put them where they should be. Children can make trees, bushes, etc. If the community is too big, your map might include just your neighborhood.
3. View film.

Resource Materials

1. Area IX film
04429 Our Community Services

1. Social Studies -
General Objectives III

This awareness can be an addition to awareness of self as a part of the family
2. Art

The purpose of this activity is: The student will become more aware of the
world. Suggested grade level: Kindergarten

BEST COPY AVAILABLE

Integration from the Curriculum

1. Discuss different countries on the globe and show where the child lives.
2. Discuss ways we are alike and different from children of other countries. (Use pictures of children from other countries).
3. If a person from another country is available, have him/her visit and talk about their country. This person might share slides, pictures, costumes, hand tools.
4. Draw a picture of a person from another country.

1. Globe

1. Social Studies -
General Objective I
Pupils and schools in
other parts of the
world
2. Art

If children achieve:

The student will become more aware of

the child's physical self.

Suggested Grade Level Kindergarten

Activities

Body Structure

1. Weigh and measure each child
2. Have students make finger prints and compare them, using a magnifying glass.
3. Make life-size pictures of students. The students work in pairs and trace each other.
4. Make shadow pictures of students' heads.

Feelings (happiness, sadness, fear, anger)

1. Have students make faces representing the four feelings (above) in a mirror and then draw them.
2. Cut out pictures from magazines that show feelings.
3. Discuss: I am sad when _____
I am afraid of _____
I am angry when _____
4. Have students role-play feelings.

Five Senses

1. Have students describe one thing they saw on the way to school.
2. Draw a picture of something they heard on the way to school.
3. Have students close their eyes and identify objects by their feel.
4. Have students close their eyes. Pass around several items for the students to smell. Have them tell what they are smelling.

Integration into the Curriculum

1. Social Studies -
General Objective I
Unit on Pupils

2. Science

Enrichment Activities

1. Box with lid -
 - a. Cut a hole in one end.
 - b. Attach a knit stocking over the hole.
 - c. Place assorted objects in the box.
 - d. Have child identify objects in the box by inserting hand and arm in the box inside of stocking.

BEST COPY AVAILABLE

5. Have students close their eyes and taste foods. They should identify the food by its taste.

Evaluation:

Instruction: The student will become more aware of his family and the roles of family members suggested grade level Kindergarten

Revised Materials

Integration into the Curriculum

1. Have students describe family members to classmates.
2. Have students bring snapshots of family to display on "Our Family Album" bulletin board.
3. Discuss the physical needs of family (home, food, clothes, love, hunger, rest, etc.)
4. Role-play each member of the family
 - a. Pretend you are your father who has just seen you playing in the street.
 - b. Pretend you are your mother who has just seen you playing in the street.
5. Discuss positive family behaviors (sharing, cooperating, respect for others' rights and helping)
6. Make a mural of jobs done in the home by father, mother and children.
7. Have students find pictures of family and family members working and playing and sort them into two groups (Work and Play).
8. Have students describe the occupations of their parents. They might bring tools their parents use. You might even want available parents to come to visit, and explain their career.

1. Social Studies - General Objective III

2. Language - Talking before a group

3. Art

1. For the role-playing, have hat or another item of clothing associated with both parents' occupations. (An apron would be appropriate if the mother is a housewife)
2. Arrange for parents to come to school and describe or demonstrate their job. A carpenter might assist the class with construction of a small project or projects. A hair stylist might demonstrate a hair styling technique.

Evaluation:

The student will become aware of a variety
of careers which are closely related to the child.

Supplement to the Kindergarten

BEST COPY AVAILABLE

Integration into the Curriculum	Resource Materials
<ol style="list-style-type: none"> 1. Discuss several different workers and their jobs by displaying pictures. 2. Make a list of the parents' jobs. 3. Make a display (bulletin board) of pictures of people in the same occupations as the parents and pictures of tools related to parents' work. 4. Available parents might be invited to come and discuss their occupations. 5. Have children role-play various occupations. 6. Prepare a worksheet on which students match workers with their tools. 7. Make a list of occupations and tools which can be related to the alphabet. Use any available pictures. (Aa-astronaut, Bb-baker) 	<ol style="list-style-type: none"> 1. Students could take pictures with an inexpensive camera.

Evaluation:

The students will gain a better understanding of the work of the school nurse.

of the work of the school nurse.

Integration into the Curriculum

1. Invite the school nurse to come and speak with the children. She might discuss what is available at the school for health services. She could discuss good food habits, proper care of the teeth and ways of keeping healthy. She could also explain equipment and tools she uses. (ie. thermometer, scales, health chart) If the nurse has children, she could tell their names, ages, and how she helps them at home when ill.
2. Color a picture of a nurse.
3. Make nurse's hats.
4. Make a health chart comparing height and weight throughout the year.
5. Role-play nurse.
6. Read stories of nurses.

1. Social Studies - Unit on Nurse
2. Art
3. Language Arts - dramatization

Resource Materials

Discuss key wage earners in the family.</p> <p>16. Write a story - suggested topics: "What My Daddy Likes to Do" "What I Want to Be When I Grow Up" "What My Mother Likes to Do"</p> <p>17. Discuss and display tools or equipment used by parents if feasible - perhaps pictures if necessary.</p> <p>18. Write on topic - "The Things I do Best"</p>	<p>Area IX Films (continued)</p> <p>04051 Families & Weather - What's the Weather 04060 Living & Growing</p> <p>3. Teaching pictures</p> <p>4. Magazine pictures</p> <p>5. Field trips</p> <p>6. Resource people</p>
<p>1. Math - Addition</p> <p>2. Language Skills - Oral expression Creative writing</p> <p>3. Social Studies - Many people doing many different kinds of work and helping each other</p> <p>4. Art - Booklet cover, Lettering</p>	<p>19. Tabulate and count parents' jobs - How many work in an office, factory, etc.</p>

The student will become aware of the

Veterinarian's job.

1

BEST COPY AVAILABLE

Integration into the Curriculum

1. Read and discuss books.
2. Show a film.
3. Have a veterinarian come to visit the classroom and talk about his job - perhaps show slides about his work - Ask him questions.
4. Let each child listen to his heart beat.
5. Observe the various colors and sizes of pills. Observe equipment used to give shots.
6. The doctor could bring guinea pigs or white mice.
7. A parent could bring a pet for the class to observe (30 minute time limit is suggested).
8. Write thank-you letters to the veterinarian.
9. Allow the children to bring a pet to school for a visit.
10. Purchase a pet for the classroom - assign duties for its care.
11. Make animals from clay and display in cages.

1. Animal units in science and health

2. Language Arts - Preparing questions, letter writing

3. Art - Modeling with clay

4. Social Studies - Interaction of people and animals

Integration into the Curriculum

1. Books from Area IX, School Library, P.M. Musser

Area IX books:
13626 Greene, I Want to Be An Animal Doctor
636.08

18542 Iritani, I Know An Animal Doctor
636.08

2. Area IX Films:
03752 Care of Pets
03198 Peppy, the Puppy
03601 Three Little Kittens

3. Veterinarian as a resource person

4. Stethoscope

5. Veterinarian supplies

6. Clay and paint

The student will become aware of the

Suggested Grade Level 1

various school workers.

Activity

1. Read and discuss books about school workers.
2. Have various school helpers come and talk to the class.
3. Discuss school rules.
4. School safety patrol captain speaks to the children.
5. Show a filmstrip.
6. Display study prints and discuss helpers
7. Show a film.
8. Role play various jobs of the school personnel.
9. Write thank-you letters to helpers who visit the room and tell about their work.
10. Visit the school cafeteria.
11. Discuss the duties of older students who work in the cafeteria.

Integration into the Curriculum

1. Social Studies -
Learn how people depend on each other
2. Language Arts -
Letter writing, oral discussion

Resource Materials

The student will become aware of the many

recreational workers and leisure time hobbies.

Suggested 2

BEST COPY AVAILABLE

1. Write a paper about your favorite hobby.
2. Have students interview someone about his or her hobby and report orally about that hobby.
3. Have a classroom hobby show.
4. Make a class hobby booklet.
5. List summer and winter recreational occupations.
6. Construct a bulletin board concerning summer activities; safety and fun.
7. Interview recreational personnel when he or she comes to speak to the class.
8. Locate the state and city parks on a map of Iowa.
9. Locate city parks using the city map or telephone book.
10. Make a list of the ways people have used rivers for recreation. What kind of recreation could you enjoy on: Mississippi River, Lake McBride, Lake Odessa, Loud Thunder Lake.
11. Discuss ways parks are funded.

Integration into the Curriculum

1. Language Arts -
Creative writing,
interviewing, reporting
(orally and written)
2. Social Studies -
Map skills

Resource Materials

1. Resource person:
YMCA
YMCA
Park superintendents
Member of park board
2. State, county, and
city maps
3. Iowa map
4. Field trip:
Parks
Hobby shop
Rock shop

Evaluation:

The student will become aware of the role
of the secretary

2

BEST COPY AVAILABLE

1. Visit the school office and talk to the secretary about her work and the office machines: typewriter, ditto, adding machine.
2. Have a bulletin board of different office machines.
3. Have a student in business from the High School or Community College come over to take a letter in shorthand and then compare it with the typewriter copy.
4. Talk about different types of secretaries.
5. Correct a letter.
6. Let students experiment with an adding machine or typewriter if these machines are available for student useage.

Integration into the Curriculum

1. Math - Addition, Subtraction
2. Social Studies - Dependence on other people
3. Language Arts - Question formation, letter writing

Resource Materials

1. Field trip to school library, school secretary, or resource person.
2. Catalogues of Office Supplies for Bulletin Board

38

supply of clear, clean water.

BEST COPY AVAILABLE

	Integration into the Curriculum	Resource Materials
<ol style="list-style-type: none"> 1. Discuss how many people in rural areas have their own well. 2. Have a man who installs farm water systems come to talk. 3. Visit the water plant in Muscatine, have someone explain what is going on. 4. Talk about men involved in getting city water and show a water bill: Worker at the water plant Meter men City clerk who collects money Plumber who hooks new homes up to the water main 5. Discuss how the supply of clean water is threatened by wastes coming from households, industries, farms. 6. Experiment with salt water. Boil salt water and collect the steam. Let the steam condense back into water which will not be salty. 	<ol style="list-style-type: none"> 1. Social Studies - Dependence on others for our needs. 2. Language Arts - oral communication 3.  - 19541 Shay, What Happens at the Library O27

Evaluation:

The student will become aware of the many

2

uses of radio and the people involved with producing and using radios.

BEST COPY AVAILABLE

1. Share books on radios.
2. Tour a radio station.
3. Bring in a resource person.
4. Talk about types of radio programs and listen to some of them. Chart the information and use radio schedules.
5. Write radio commercials.
6. Simulate a radio program in the classroom.

Integration into the Curriculum

1. Social Studies - Learning of the importance of radio in our lives.
2. Language Arts - Creative writing, oral speaking

Resource Materials

1. Area IX Books:
11599 Gould, All About
Radios and TV 621.38
2. Childcraft -
Volumes 10 & 7
3. Resource people:
Ham operator
Patrol car policeman
Radio announcer
Station manager
Newsmen
Disc Jockey
Owner of walkie talkie

Evaluation:

The student will become aware of the

production of food from farm to store.

2

BEST COPY AVAILABLE

1. Discuss ways in which foods are bought.
2. Visit the local supermarket with very specific questions for the manager.
3. Make a collection of labels from cans and packages of food.
4. Make a picture story of milk or other food products from farm to houses in the city or the supermarket. Visit a dairy. Invite the school milk man to spend a few minutes talking to the class.
5. Make a series of pictures showing the way one food travels from farm to processing plant, to the retail grocer, to the home, to the family table. These can be pasted on a long strip of paper and shown on an opaque projector.

Integration into the Curriculum

1. Social Studies -
Understand that many people interact in the food production process
2. Math -
Discuss why food costs involve more than the farmer's selling price of food items.
Identify services which "add" to the cost of food. Compare the farmer's selling price and the consumer's purchase price and discuss the "difference"

Resource Materials

3. Texts:
Stories About Sally Ginn

Barbie Beauty Care Center
2. Magazines
3. Microscope
4. Beautician's tools
5. Telephone book
6. Dictionary
7. I Want To Be a Beauty Operator - Baker

Exhibition:

BEST COPY AVAILABLE

Suggested Grade Level 2

Integrate into the Curriculum

3. Using telephone books from Muscatine and the areas, look up the beauty schools and salons available to the public.
9. Construct a crossword puzzle using the terms applicable to the beautician's profession.
10. Have the children bring in examples of the beauty care products used in their homes.
11. Make a chart listing and illustrating the beautician's tools.
12. Field trip to a beauty school.

The student will learn about the different
types of doctors and related workers.

2

BEST COPY AVAILABLE

1. List the different types of doctors. What does each do?
2. Why is the doctor often called our friend?
3. List various steps in a health examination and the importance of each.
4. Also list the special tools used and record on a chart for further reference.
5.
 - a. Checking eyes - eyes chart, opthalmoscope
 - b. Weighing and measuring - scale with height measure
 - c. Taking temperature - thermometer
 - d. Checking ears - otoscope
 - e. Listening to the heart and lungs - stethoscope
 - f. Giving shots - inoculating needle.
5. Draw pictures of doctor tools.
6. Encourage children to bring play doctor kits. Discuss the objects in the kit and the uses of each. (Good for role playing)
7. Invite a doctor to school to visit with the children.

Integration into the Curriculum

1. Health
2. Science
3. Language Arts -
Correct sentence
structure, proper
letter form, written
expression, question
formation
4. Social Studies
5. Music
6. Art

Materials

1. Doctors' instruments
2. Play Dr. Kits
3. Doctor
4. Puppets
5. Field trip to
Drs. Clinic
6. Microscope, slide of a
drop of blood.

BEST COPY AVAILABLE

8. Write stories and poems about the doctor.
9. Dramatize how to call a doctor.
10. Visit a doctor's clinic during off hours.
11. Write thank you letters.
12. Children make diagrams of a hospital room.
13. Visit a hospital.
14. Show films and filmstrip of people who work in a hospital.
15. Make a hospital scrap book.
16. Emphasize the interdependency of all workers in a hospital and the relatedness of their work.
17. Discuss why people sometimes go to see the doctor even when they are not sick.
18. Discuss the ways in which we can help the doctor do his work more easily and effectively.
19. Discuss the importance of following the doctor's instructions.

Activity

20. Other health related occupations may be listed and discussed. This unit could be extended to include the children's ideas of good health practices that help to keep us well:
Rest
Exercise
Dress for the weather
Cleanliness
Good Eating habits
21. Discussion of services people perform without pay in our hospitals. (Ex: Gray ladies)
22. Role-play a lab technician getting blood from a patient, taking it to the hospital laboratory and then studying it by using a microscope for the children to study a blood slide.

The student will become aware of the role
of the osteopath doctor.

2

BEST COPY AVAILABLE

1. Interview an Osteopath
 2. Tour of the Osteopathic Hospital
 3. Discuss the "special" tools of an Osteopathic physician.
- Awareness:
Imagination and description game. Pretend you are examining a patient. Pretend you are setting a dislocated knee.

Integrate into the Curriculum

1. Language Arts - Oral expression
2. Social Studies
3. Health

Resource Materials

1. Resource person
2. Osteopathic Hospital
3. Inexpensive plastic skeleton

Evaluation:

The student will better understand the

Suggested Grade Level 2

Chiropractor's occupation.

BEST COPY AVAILABLE

Activities

1. Interview a chiropractic student - possibly a parent.
 2. Discuss the tools: X-ray, etc.
 3. Recognition of symbols representing each medical profession:
D.C. - Dr. of Chiropractic
D.O. - Osteopath
M.D. - Medical Doctor
 4. Field trip to Palmer College of Chiropractic
- Awareness:
Comparative discussion of differences between a chiropractor and medical doctor.

Integrated Language Arts
Content

1. Language Arts -
Oral expression
2. Social Studies

Reference Materials

1. Chiropractic student
2. Machines and tools
3. Palmer College of Chiropractic

Evaluation:

The student will better understand the role
of the nurse in the medical field.

2

BEST COPY AVAILABLE

1. Construct a bulletin board illustrating "caps" and "pins" as identifying individual schools of nursing from the near-by area.
2. Identify where nurses are employed: hospitals, nursing homes, home services, "free clinics", factories, etc.
3. List a nurses tools and discuss their variance according to her specific assignments.
4. Have a nurse visit the classroom and discuss her duties and responsibilities as a nurse.
5. Construct and illustrate a chart on the various tools a nurse may use.
6. Discuss the life of Florence Nightingale and her contribution to the nursing profession.
7. Construct a bulletin board concerning different aspects of nursing.
8. Children research one health occupation:
Make a picture of this person on T.V. and tape a narrative to show to parents.

Awareness:

1. Have the children role-play the various duties of a nurse.

Integration into the Curriculum

1. Social Studies -
Unit on "Workers Who Keep Us Safe and Well"
2. Art -
Unit on reality in what we see
3. Literature -
Biographies

Resource Materials

1. Caps and pins from nurses displayed
2. Telephone books
3. Resource person
4. Tape recorder and TV viewer

2. Chart childrens' growth as recorded by a nurse in a doctor's office: height, weight, age, etc.

3. Construct "A Booklet About Me". Include the following:
Baby picture and a picture of me now
Childhood diseases I've had
My hand print and footprint
How many teeth I have
I wear glasses
I have visited the dentist

4. Discuss the interdependence of nurses and doctors.

Evaluation:

The student will better understand the role _____ 2
of X-ray technician as a member of the medical team.

BEST COPY AVAILABLE

1. Interview an X-ray technician.
2. Look up places where X-rays can be taken in Muscatine and the Quad Cities.
3. Bring in X-rays to show what they look like.

Awareness:

1. Class discussion on experiences with X-ray technician. How did you feel as you were waiting for your X-ray? What did the technician tell you he was going to do? Did you feel differently after your visit to him?

Integration into the Curriculum

1. Social Studies - Unit on "Workers Who Keep Us Safe and Well"
2. Language Arts - Unit on reference skills
3. Health
4. Focus on self development awareness

Resource Materials

1. Resource person
2. Telephone book
3. X-ray lab

The student will better understand the role of the receptionist as she relates to Our World of Work. 2

BEST COPY AVAILABLE

1. Have a receptionist visit the class to discuss her occupation.
 2. Have the children practice filing by having them alphabetize their names for a class booklet of workers.
 3. Compare the duties of the receptionist to a secretary.
- Awareness:
1. Role play the various duties of the receptionist.
 2. During open house or kindergarten round-up, have a child appointed as a receptionist representing their room.
 3. Character Clues: The class might discuss the importance of a pleasing personality and what you can tell from expressions and gestures.

Integration into the Curriculum

1. Social Studies - Unit On "Workers Who Provide Some of Our Basic Needs"
2. Language Arts - Applies to reference skills
3. Language Arts - Critical thinking
4. Focus on self development awareness

Resource Materials

1. Resource person - possibly a parent

Subject: Science

The third grade social studies curriculum is so designed that career awareness receives considerable emphasis. Consequently the committee has added few activities. Teachers are encouraged to use the bulletin board and game activities.

The students will become more aware of lumber. Suggested grade level 3

related occupations.

1. Have students color the pages after discussing the caption and the action seen in the pictures. The pictures describe the occupations of:
 - a. loggers
 - b. yarder
 - c. boom men
 - d. foresters
2. Visit a local lumber yard and observe:
 - a. Types of work done there
 - b. Types of wood products available
 - c. Origin of some of the materials
3. Ask a carpenter to visit the classroom. Invite him to let students help build a small project during the visit.

Integration with the
Curriculum

1. Social Studies -
On lumbering

Resource materials

1. Coloring book on logging occupations (free)
Alaska Loggers Assoc.
Professional Bldg.
P.O. Box 425
Ketchikan, Alaska 99901
2. World Book L: 450
L: 451

BEST COPY AVAILABLE

The student shall recognize the dignity

in work.

Suggested Grade Level 3

1. Workers from various occupations could be invited to the class to explain why they enjoy their work. (The teacher would need to do careful planning to insure the success of this activity. See the activities section in the back of this guide for planning aids).

Integration into the Curriculum

1. Social Studies

Resource Materials

1. Parents or other close relatives of the students in your class.

BEST COPY AVAILABLE

The student will become aware of his position
in his family.

3

BEST COPY AVAILABLE

64

1. Develop a discussion around these questions:

- What is a family?
- What is the family to which you belong?
- How are families alike and different?

2. Make a bulletin board showing the occupations of the member of the childrens' families.

"Our Job Tree"

1. Could be used as an introduction to social studies since it deals with so many occupations.

Evaluation:

57

The students will become aware of the
need for good sportsmanship.

5150 Area 1956-1957 3

The students will become more aware of the Suggested Grade Level 3

occupations involved in the manufacturing of clothing.

BEST COPY AVAILABLE

Resource Materials

1. Social Studies -
Unit on clothing

1. Incorporate a discussion of the various workers involved in the manufacturing of clothing.

- a. designer
- b. pattern designer
- c. pattern cutter
- d. material cutters
- e. seamstress
- f. models
- g. foreman
- h. alterations person
- i. clothing salesperson

2. Role-playing a clothing salesman selling a suit. Emphasize the climate where the suit will be worn, the kind of fabric, size, fitting and colors of clothing.

The students will become aware of the
duties of the game warden.

Suggested Grade Level: 3

	<p><u>Integration into the Curriculum</u></p> <ol style="list-style-type: none"> 1. <u>More Than Words</u> "A Family of His Own" 		<p><u>Resource Materials</u></p> <ol style="list-style-type: none"> 1. Mr. Jennings, Game Warden
--	---	--	---

1. Invite a game warden to your class to discuss the various aspects of his job and his responsibilities.

BEST COPY AVAILABLE

Evaluation:

The students will become acquainted with jobs
available in their own city. 3

BEST COPY AVAILABLE

1. Have students find various occupations in the yellow pages and classify them.
2. Have students draw pictures of the various workers representing the occupations and display them.
3. Have students write short descriptions to go with the pictures.
4. Students could each choose an occupation. Act it out and have the class figure out who they are and what they do.
5. Conduct a drawing relay (See the supplemental materials section of this guide, page 130).

Integration to the Curriculum

1. Social Studies - Exploring job opportunities
2. Language Arts - Develop skills in alphabetizing, writing skills
3. Art - Drawing

Resource Materials

1. Telephone books

Topic: The students will become aware of a variety 3'
of related jobs.

BEST COPY AVAILABLE

The student will become aware of the many

4

facets of a forest ranger's job and the various

areas of learning it entails.

BEST COPY AVAILABLE

1. Invite a forest ranger (conservation officer) to come in and discuss his career. Have him show slides to further extend the student's understanding of this career. (Tape the information for future reference)
2. Awareness - Encourage the students to prepare questions for the resource person that will help them become more aware of the "interdependence" of this individual within society.
2. Incorporate the fourth grade magazine, Ranger 'Rithmetic into the science unit and some of the math units on addition and subtraction, multiplication and division.
3. Make a diorama or a poster depicting some aspect of the fact that about 90% of our forest fires are caused by man's carelessness thoughtlessness.

Integration into the Curriculum

1. Language Arts - Develop the students' ability to construct well written sentences
2. Math - Units on addition and subtraction and multiplication and division
3. Science - Addison Wesley unit - "Water and the Land"
4. Handwriting - Stress the importance of good manuscript writing when making posters

Resource Materials

1. Resource person - Forest Ranger
2. Tape Recorder
3. Slide projector
4. Ranger 'Rithmetic Magazine
5. Social Studies Materials
6. Science Text
7. Language Arts Text
8. Reading Text

secretary and become aware of the various skills required for this profession.

BEST COPY AVAILABLE

Activities

Integration into the Curriculum

Resource Materials

1. Interview your school's secretary. Also, invite a secretary from a doctor's office and a secretary from a local factory to come for tapes for a discussion on the likenesses and differences of the various secretaries.

Awareness:

The students will explore their personality and character traits and become aware of how they relate to themselves and others.

2. Show the Guidance associates filmstrip series entitled "Your Personality: The You Others Know", and discuss.

3. Have the students write detailed descriptions of themselves (stressing their personality and character traits). They are to exclude their name and then the students will read each others descriptions and the class is to guess who that person is.

4. Assign the students various broad categories of things such as food, clothing, etc. Ask them to find and clip out of magazines as many different items that fit under their category as possible. Then have them make and attach written labels to their pictures and see how quickly they can correctly arrange the pictures alphabetically.

1. Language Arts - Chapter 2 - "All About Yourself" p. 32, 33 & 35 Chapter 3 - Nouns and Adjectives (Should be able to use nouns and adjectives correctly and successfully in order to better express yourself) Chapter 4 - Be able to use the correct form for a business letter. Chapter 8 - Be able to understand and use the various dictionary skills
2. Reading - Have an understanding of oral and written communication (Unit 1 of The Magic Word)

Unit 2 of The Magic Word - Skills - Finding the meaning of words, the dictionary and dividing words into syllables.

1. Resource people: 3 secretaries
2. Tape recorder
3. Tapes
4. Guidance Associates filmstrip series
5. Magazines
6. Language Text
7. Reading Text
8. Equipment for display

BEST COPY AVAILABLE

5. Set up a display of a variety of equipment a secretary uses. (Typewriter, file cabinet, pencil, etc.) On note cards list some of the skills she will need to know in order to successfully use the equipment.
6. Make reports on different aspects of oral and written communication.
7. Devise a listening activity where the students will have to write down everything you read to them. (You can only read each sentence once.) This activity can demonstrate a secretary's dictation skill.
8. Write a business letter to a company and request information on various careers.

Integration into the Curriculum

Resource Materials

The student will learn about the job of a

4

bush pilot and his needed equipment and be able to compare and

contrast this career to that of other types of pilots.

BEST COPY AVAILABLE

Activities	Integration into the Curriculum	Resource Materials
<ol style="list-style-type: none"> 1. Have the students read the story "On the Wing in Alaska" (p. 318-321 of <u>The Magic Word</u>) as an introduction to the skilled and difficult job of a bush pilot. 2. Select volunteers to do role-playing as bush pilots in Alaska. Suggest that they dress in the uniform of a bush pilot and prepare murals and pictures and maps, in order to help explain their career and the great courage it requires. 3. Read books about airplanes and then construct a model of the small, slow-engine plane flown by a bush pilot. 4. Make a large poster tracing the history of the airplane from the time of the first flying machines to the jet plane of today. Include a brief description with each plane. 5. Incorporate the science unit on "Friction" into this lesson. 6. Have students write letters to airline companies asking for free information. 7. For the Japan unit, make a map of Japan and trace some of the airplane routes within Japan and between Japan and other countries. 	<ol style="list-style-type: none"> 1. Reading - To be able to comprehend and understand a story in the text and build the students' vocabulary. 2. Language Arts - <ol style="list-style-type: none"> a. Gain experience in role-playing a particular career b. Become familiar with language techniques that inform & persuade c. Understand the correct form for a business letter 3. Science - Understand the way a plane works 4. Social Studies - The importance of air transportation in Japan 5. Art - Use of various art techniques in making posters, murals, models, etc 	<ol style="list-style-type: none"> 1. Reading Text 2. Uniform of a bush pilot 3. Art materials 4. BEST COPY AVAILABLE

Activities	Integration from the Curriculum	Resource Materials
<p>4. Have the students collect newspaper clippings pertaining to Japan and/or India. Select a student to be a news editor for a television program and have different students who have collected the current events play the role of reporters. The editor introduces his reporters who then come to the microphone (a small, empty can mounted on a stick) and report their news.</p> <p>5. After the class has studied one of the 5 countries for Social Studies, select a child to pretend he is a reporter visiting that particular country. Individual class members will act as residents. The reporter will try to collect information about the country by asking questions on such subjects as: food, customs, occupation, etc.</p> <p>6. Incorporate the Addison Wesley Science Unit on "Vibrations and Sounds" into this lesson on broadcasters.</p> <p>7. Show the Guidance Associates filmstrip on a Sportscaster, from the series entitled, <u>People Who Organize Facts</u>, and discuss.</p> <p>8. Have the children plan and produce a radio program. Select committees to plan and be responsible for each part of the program: announcers, singers, news casters, sportscasters, etc. Tape the program so the next day the class can evaluate it from the listener's point of view.</p>	<p>3. Reading -</p> <ol style="list-style-type: none"> Be able to comprehend and understand a story about a newscaster Be able to select important details and make judgements <p>4. Science -</p> <p>Discover how some of a broadcaster's equipment is constructed and functions, and how the sound is transmitted through the instruments</p>	

Evaluation:

The student will explore the duties and some of the professional experiences of a veterinarian, and become aware of the types of subjects he is required to study in order to obtain a degree in this field.

4

BEST COPY AVAILABLE

1. Have students do research and make reports on the career of a veterinarian. Suggest that the students arrange this information in a scrapbook form.
2. Interview a local veterinarian and discover some of the things his job entails; the type of training and the courses he was required to take in order to become a certified veterinarian, and some unusual experiences he has encountered during his years of work.
3. Take a tour of a veterinarian's office to further understand his type of work.
4. Write a thank you note to the veterinarian.
5. Incorporate the science unit on mystery powders into this lesson. Guide the students to understand that a veterinarian has to have a good understanding of chemistry in order to obtain a job in this field.
6. Set up a role play situation where some students dress up as veterinarians and play the role of this person. Have other students act as owners of various animals. (They can bring in stuffed animals.)

Investigation of the
Community

1. Language Arts -
 - a. Be able to successfully collect information and make reports.
 - b. Correct form for thank you letters
 - c. Have experience in role-playing a particular career
2. Social Studies -
 - a. Be aware of the unusual animals of Australia
3. Science -
 - a. Understand that a veterinarian must be able to successfully perform experiments with chemicals
4. Reading -
 - a. Become familiar with some of the stories and books written about animals from Australia and veterinarians and their many animals.

Resources for the
Community

1. Information on Veterinarians
2. Resource person - Veterinarian
3. Veterinarians' Office
4. Language Arts Text
5. Bulletin materials
6. Social Studies Materials
7. Reading Text

Activity

Career Breakfast

1. Invite parents to a Career Breakfast. (Beverage and sweet rolls or donuts). Each parent dresses in his work clothes and is asked to bring any equipment for display or demonstration.
2. Make invitations. (optional) (This may be a letter from the school explaining the activity)
3. Make name tags relating to parent's occupations (Ex: beautician - outline of a hair brush)
4. Collect pictures of various jobs (of parents' jobs if possible) to be used on a wall display during breakfast.
5. Demonstrate correct procedure for making introductions.

Day of Breakfast

6. Students act as host and hostess.
7. Each student is to interview at least two other parents and discuss something interesting that he learned during the interview.
8. Write thank you letters to all who participated in making the Career Breakfast a success.

Integration into the Curriculum

1. Language Arts -
 - a. Proper sentence structure in composing invitations and thank you letters
 - b. Correct procedure followed in making introductions
 - c. Oral expression
2. Art -
Proper design selected for occupation... eye-catching and colorful

Resource Materials

1. Parents
2. Magazines
3. Career pictures
4. Equipment used in various jobs
5. Trade magazines
6. Camera
7. Tape recorder
8. Career books

Note: This idea was adapted from the Davenport Career Education guide.

Awareness

Through interviewing parents, the youngsters can recognize that personal satisfaction may come from work, and also he may be aware of the feelings of peers and adults

129

Student Activity 1

Plan a make-believe family. How many will be in your family? Decide what career you will have and how much money your job will earn per year.

Now you plan how you can or must spend your money. Think about these questions before you fill out the following worksheet.

- a) What kind of home will you live in? Will you be buying it or will you be renting?
- b) How much money will you spend for food, clothing, recreation, and savings per month?
- c) How many cars will your family have?
- d) How much money would be spent annually on medical and dental bills? Monthly?
- e) What kinds of insurance will your family have?
- f) What kinds of taxes will you have to pay and how much?
- g) How much money will you allow for repairs?
- h) What furniture and appliances will you have in your home and how much will they cost?
- i) How much money will each member of the family need for clothes?

Occupation _____ Annual Income _____

Spouse's Occupation _____ Income _____

Amount of Income Taxes per year _____

Total number in family _____

Home

Number of rooms _____ Age _____ Buying _____ Renting _____

If buying: cost of home _____

Monthly payment on mortgage _____

Amount of property taxes per year _____

If renting: Monthly rent _____

Cars

Number of cars _____

Amount spent on car payments per month _____

Amount spent on gas per month _____

Cost of car insurance per year _____

Cost of license per year _____

Food

Amount spent for food per week _____ per month _____

Medical

Amount spent per year for: Medical bills _____

Dental bills _____

Medical insurance _____

Life insurance _____

List the prices of furniture and the appliances that you have in your home. Use a catalogue to help you figure the cost of each one. How will you plan to pay for these if you can't afford to pay cash for them? How long will they last before they will have to be replaced?

<u>Item</u>	<u>Cost</u>
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

Cost of furniture per month _____

Cost of appliances per month _____

Recreation

List the recreation equipment you will have and the cost of each item.
Use a catalogue to determine cost.

<u>Item</u>	<u>Cost</u>
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

Clothing

Amount spent on clothing for you _____

Amount spent on clothing for your spouse _____

Amount spent on child 1 _____

Amount spent on child 2 _____

Amount spent on child 3 _____

(Hint: In estimating amount for clothing, use the catalogues to help you determine cost.)

Savings

Kinds of savings _____

Amount of savings _____

Summarize your work

What are your total yearly expenses? _____

What is your total yearly income? _____

How do the two compare? _____

What are your monthly expenses for each category?

Home _____

Cars _____

Food _____

Medical _____

Insurance _____

Taxes _____

Home Furnishings _____

Recreation _____

Clothing _____

Savings _____

Hints to the teacher:

Let the child try this activity first without much teacher help.

Have catalogues from Sears, Wards, etc. available. Also new and used car ads from the local paper.

After the children get going on this project, resource people could be invited to visit the classroom to give advice for such things as taxes, insurance costs, and financing matters.

Notice that some costs are monthly and some are yearly.

Statistics show that people should obligate no more than $\frac{1}{3}$ of their income to housing expenses.

SUPPLEMENTAL MATERIALS

The following pages contain letter forms, field trip guides, interview tips, bulletin board suggestions, and other activities which may help you implement self-awareness and career awareness. Please let us know of additional activities you find effective.

GUEST SPEAKER GUIDELINES

To: _____

Thank you for consenting to come to _____ School on
_____ at _____ (A.M. - P.M.). You will be
(Day and date)
speaking to _____ grade students in Room No. _____
(No.) (Grade)

We would expect that your presentation would last approximately
_____ minutes.

One of the major goals in our school is to help students become
more aware of the many careers that they must understand before
choosing their life's work. The purpose for this visit is _____
_____.

Attached to this letter is a list of suggestions which may help
you plan the visit. Please do not feel that you must follow all of
the suggestions or that you must confine your presentation to what
is suggested.

Thank you for giving of your valuable time to help our youngsters
learn more about careers. If you have any questions, feel free to call
me at _____.
(Phone no.)

Cordially,

_____, Teacher

Attachment

SPEAKER SUGGESTIONS

When you visit with elementary students you may like to plan your presentation so that the following questions will be emphasized.

1. Your Job
 - Exactly what do you do?
 - What training or education was required?
 - What school subjects would be valuable on this job?
 - What tools do you use?
 - What are the joys and problems of your job?
 - What dangers exist in your work?
 - Do you work with other people? Who?
 - What is the future outlook of your career?
 - Explain terms of your trade that seem simple to you but which may be unfamiliar to others.
2. Some Successful Questions are:
 - "Do you ever wonder who....?"
 - "What do you think would happen if there were no....?"
 - "What do you think you must do if you want to be a ...?"
 - "How do you think I help boys and girls and other people?"
 - "What I want you to do is..."
 - "When would you want (or need) a?"
 - "Where do you suppose...?"
 - "How do you think it would feel to be ...?"
 - "Why do you think we need....?"
3. If possible try to use one or more of the following aids to illustrate your presentation.
 - Slides
 - Pictures
 - Tools
 - Work clothes (uniforms, etc.)
 - Printed materials
4. The elementary student responds better to an informal presentation with the presenter using simple vocabulary.

FIELD TRIP GUIDELINES

To: _____

Thank you for consenting to let us come visit you on _____.
(Day and date)

Our expected arrival time is _____ (A.M. - P.M.) and we should
be ready to leave your location _____ (A.M. - P.M.). Our
group will consist of _____ (No.) _____ (Grade) grade students and _____ (No.)

adults.

One of the major goals in our school is to help students become
more aware of the many careers that they must understand before
choosing their life's work. The purpose for this visit is _____
_____.

Attached to this letter is a list of suggestions which may help
you plan the visit.

Thank you for giving of your valuable time to help our youngsters
learn more about careers. If you have any questions, feel free to call
me at _____.
(Phone no.)

Cordially,

_____, Teacher

When you have elementary students visit your business or industry you may like to take the following items into consideration.

1. **Your Business and Industry**
 - . What service or product is your company involved with?
 - . What are all the different careers involved in your company?
 - . How is your company's product or service used by people?
 - . What impact/contribution does your company's service or product have in the community?
 - . What are the important criteria your company uses in hiring people (attendance, skill, physical and mental, attitude, etc.)?
 - . What is your company's future?
2. **Some Field Trip Considerations**
 - . Don't plan a lot of walking by students.
 - . Make sure students can see what you would like them too (safety windows to high, etc.).
 - . Show them a variety of careers.
 - . Show them your service or product as it starts and finishes.
 - . If possible involve several students in some operation of your company.
3. **Some Successful Questions You May Ask:**
 - . "What do you think would happen if there were no (service or product)?"
 - . "How do you think a service or product helps boys and girls and other people?"
 - . "When would you want (or need) a (service or product)?"
 - . "Why do you think we need (service or product)?"
4. **The elementary student responds better to an informal presentation with the presenter using simple vocabulary.**

Worker Interview Questions

- I. Job Title _____
A. What do you do on this job? _____

- II. Future employment prospects:
A. What demand is there for this job? _____

B. What training do you need for this job? _____

- III. What qualifications must you have for this job?
A. Age _____
B. Skills required _____
C. Other physical requirements _____

- IV. What are your feelings about this job?
A. What do you like about it? _____

B. What do you dislike about it? _____

- V. How is the work environment?
A. Is it clean? Noisy? _____
B. Do you work alone or with others? _____

C. Is your job dangerous? _____

RELATED CAREER GAMES

What's My Line - Panel Game. Choose 5 or 6 members of class to make up the panel. Another student assumes the role of a particular worker. The panel questions the "Contestant" and tries to determine his occupation.

To Tell the Truth - Variation of television game having three contestants only one of which is "telling the truth". The class must ask general probing questions in search of the correct person. A time limit could be established during the questioning of each contestant. One student will assume the role of a career that he has researched and the other two contestants should try to fool the class as best they can.

Who, What or Where? - The categories "Who", "What", and "Where" are written on the board. Three contestants are chosen. Each contestant is allowed a total of fifty points to bid. He can wager fifty or any lesser amount under one of the three categories. For example, Contestant #1 writes "Who" for forty on his paper, Contestant #2 writes "Who" for fifty, and Contestant #3 writes "What" for 20. Contestant #3 has a chance to answer the "What" question and Contestant #2 wins the "Who" question with the highest bid. Missed questions result in loss of the points bid. When a player reaches zero points he is out of the game and a new contestant is chosen to replace him.

Password - Have four students come to the front and pair them off. Each pair then should be given one card with a career term on it. Only one person in each pair gets to see the word and he must then, in turn, give his partner a one word clue from which the term is guessed. If this person doesn't guess the word, then the other pair has a chance at the term. A point system determines the winner.

Twenty Questions - One student is selected to think of a specific career. The class is allotted a total of twenty questions to recognize the career. Answers must only be yes or no.

Career Chain - One pupil starts with a career word, such as Carpenter. The next pupil must say the first word (Carpenter) and then give a related word. For instance, he might say, "Carpenter, hammer." The next pupil must repeat the given words in order and give another related word. He might say, "Carpenter, hammer, nail." The game continues as such.

Name That Job - "I'm thinking of a person who works for the government of public transportation. He spends most of the time in the air." The child that gives the right answer becomes the leader.

Jeopardy

Public
Service

\$10	\$10	\$10	\$10	\$10
\$20	\$20	\$20	\$20	\$20
\$30	\$30	\$30	\$30	\$30
\$40	\$40	\$40	\$40	\$40
\$50	\$50	\$50	\$50	\$50

Any five
job clusters

Select three players. First contestant selects a number under the job category of his choice. The teacher then gives the answer to the question. (i.e. student chooses "Public Service \$30". Teacher gives answer "Policeman".) The student must, in ten seconds, provide the question which the teacher has just answered to win the \$30. (i.e. "Who directs traffic?") If the student misses, the other two contestants are given an opportunity to answer. The first contestant must forfeit the \$30 or go "in the hole". The contestant who makes the last correct answer is allowed to select the category and amount for the next question. Teacher should allow five to ten minutes for each game. Student with the most money at the end of the game wins.

Occupational Squares - Choose nine people to represent nine different careers. They each sit in a Tic Tac Toe position and represent their career. Divide the remaining classmates into two groups (X and O). The first person on Team X asks a "yes" or "no" question to any square. After the response, Team O asks a question. Each team consecutively ask questions until one team thinks they know the occupation. Then they may take their turn to ask "Are you a _____?" If they guess the occupation correctly, they get the square. If they miss, their opponents get the square.

Thumper - Each child and teacher is given an occupation. Everyone thumps on desk or floor - leader starts - "What's the name of the game?" - Response - "Thumper" - Question - "How do you play?" - Response - "You thump." The leader states his occupation and states someone else's. That person must state his own occupation then someone else's. If the child misses, he must state everything he knows about the occupation. That child then becomes leader.

Clue - Make picture cards of equipment related to special careers. (example: picture of a hammer) Hold up a clue card. Each student then guesses the related career.

Helper's Chart

A CORPORATION'S BOARD OF DIRECTORS

Concept: The process of the Inquiry Approach produces, processes and applies data

Objectives: Students will be able to:

- Use the Inquiry process as one technique for obtaining data about occupations.
- Exhibit a change in skills of communication by improving their data collection and application.
- Perform questioning strategies to create new data about occupations; their traits, responsibilities and tools.
- List the types of questions that will give them large concepts contrasted with those that will give them specific facts.
- Listen, analyze and then respond to created questions.

Statement:

This activity can be adapted to any grade level. The process of the activity is the major focus and should be carried out, at least, three times a week. As students become more skillful, try colors, concepts, words that define concepts, tools, behaviors, feelings, etc.

Materials:

1 felt pen
35 3 x 5 cards

Activity

Day 1

20 min. Explain the rules of the simulation

Rules: You may ask questions

You may ask only 3 questions per person

If a person has identified their card then you take it off of their back and put it on front of them

Questions can be answered with only yes or no

Place cards on backs of every one in the room and then allow them to ask their questions. If anyone identifies their occupation they are to continue to answer questions for the others.

- 15 min. After 20-30 minutes stop the activity and have them place their cards on the front and then have them group themselves according to similar services performed. Have each group define why they have grouped themselves in particular group.
- 10 min. Discuss the large concept of how and why we group things such as occupations, services, people, society, etc.
- 5 min. Finalize lesson by answering questions the students may have on how to ask questions to get data for new questions. Prepare them for the session the next day.

Day 2-3-4-5

- 60 min. Continue to use various occupations until students have developed some sort of sophistication in questioning strategy.

Be sure to use the same strategy as in Day One.

Have the students develop and hand in their jobs they have found, that are different, for the next days cards.

Day 6

- 60 min. Implement the student cards. Use the same strategy as in Day One.

Day 7

Intiate new concepts and dimensions of the game. Try behaviors or people traits.

Comment:

Sometimes we should treat the program and not the child. The child is a product of the program. This approach should be used in a non-authoritarian manner. Structuring students natural questioning strategy too much creates un-natural communication. Children should have the opportunity to develop freely with personal guidance from the teacher. There should be no condition to right or wrong but should be considered a fact of human fraility.

Developed by
John Davies
Specialist, Career Awareness
State Board of Education

Objective:

Communication through drawing

Materials:

Construction paper (several sheets)

Pencils

List of Tools, Products or jobs

Procedure:

1. Arrange the students in groups of five, having them sit on the floor in a circle.
2. Place one pencil and some paper in the center of each circle.
3. Number the students in each circle from 1 to 5. Seat yourself as far away from the circles of students as you can.
4. When the signal is given, the first student from each circle comes to you, he is to come without pencil or paper.
5. Tell each one the name of the first item on the list.
6. Each student returns to his respective circle, takes the pencil in the center and draws (without talking) the item until someone in the circle correctly identifies it.
7. The second person in the circle comes to you and tells you what the group has determined the drawing is.
8. You then give that student a new tool, product or job to draw.
9. A sample list of items or objects follows:

wrench	plywood
policeman	2 x 4
bread	logger
screwdriver	chain saw
waitress	log truck
can	axe
doctor	wedge

Generate a list of about twenty items.

10. Remind the students that if they yell out what is being drawn, others will hear.

A B C Game

Date: February 15, 1974

Grade Level
4-6

Concept: Developing an understanding that jobs have titles, products, and a work station, require tools and exhibit certain traits.

Objectives: The student will be able to:

- List the occupations of a school or those viewed on a field trip
- Identify at least one tool for each occupation listed
- Distinguish and write at least one trait observed in the occupations listed
- Describe at least one product produced by each occupation listed

Statement: This activity was planned for a total classroom working in pairs or groups. The activity could be used with primary children if preliminary work is done.

Suggestion: If this activity is used with primary children, it might be advisable to allow 6th year students to record the primary children's observation.

Materials: ABC Summary Sheet
pencil
writing board
4 large pieces of butcher paper
4 felt pens

Activity: Day One:

Distribute inventory sheet and make the following assignment: "In teams, you are to go around the building and record on your inventory sheet the jobs you observe. Each job should be placed in the correct alphabetical order. A product, tool, and trait should be entered in the correct alphabetical box. The product, tool, and trait do not have to be placed directly across from the job observed."

Note: Be sure to set time limits for this part of the exercise.

Day Two:

The teams of students should enter their findings on sheets of butcher paper. Each individual sheet of butcher paper should have one of the following headings: job, product, tool or trait. The students should enter all of their data regardless of duplication.

The class should appoint a team of students to eliminate duplication and to prepare a new data sheet.

Day Three:

Identify one occupation from the job data sheet. Mark the items of the lists of the other sheets that occur in identified job. Then choose another job and repeat the process. Do this for at least 5 jobs.

Questions to ask after going through the above process:

- How many of the jobs utilize the same tools?
- How many of the jobs produce the same product?
- How many of the jobs demonstrate the same observable traits?

Day Four:

Review the previous day's discussion. Carry on an open-ended discussion by utilizing the following questions:

- If jobs are different, what makes them different?
- If jobs are similar, what makes them similar?
- Is work enjoyable?
- What is the difference between a job and work?

Note: Value clarification assumes we all have ideas and notions about concepts and words. It would be exciting to allow the students the opportunity to break into small groups to clarify their definitions of job, work, traits, product, etc. It may be advantageous to have a definition of terms sheet that the class develops by the process of consensus.

Day Five:

Instruct the students to get into pairs and develop a set of 3-5 questions to use when interviewing a school worker.

Day Six:

Allow students to arrange interviews with selected school personnel.

Day Seven, Eight, Nine, Etc.:

Conduct the interviews and allow students to discuss their information with other groups. Try arranging for interviews of businessmen in the immediate community.

Comment: The degree of spontaneity of the children will determine the amount of learning that is taking place. The focus on specific identified areas of spontaneity of children will provide teachers with insights to developing the curriculum for the next day of school.

INSTRUCTIONS FOR MAKING THE SQUARES FROM TEMPLATES

Use heavy card stock or tag board.

Use different colors for each set made (stripes even sets separate).

Number each piece as shown in the pattern. There are a total of 15 pieces for the five squares.

Letters are the key figures. Each letter, A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z, should appear on each set made. Each set will have a set number, eg., set 1 is numbered as shown on template for Set 1, etc. Set 2 would be: A-2, E-2, G-2, etc.

It is MOST IMPORTANT that the pieces be made in envelopes (size 7½" by 10½" is suggested) according to the letter figures. In other words, all A pieces are in an envelope, all B pieces in an envelope, etc.

When players are finished, they should put pieces back in their envelope according to the letter.

Be sure NO COMPLETE PUZZLE Squares are in an envelope.

You may want to number and letter pieces on either side or both sides of the piece. It makes no difference, so long as each piece is numbered and lettered in order to get it back into the proper envelope. The numbers/letters have nothing to do with how the squares go together.

5-5 pages. Tenor 5

BEST COPY AVAILABLE

Grades 3-5

Objective: The activity allows students to express their values as to which traits of a student are most important to them.

Outcomes: Students will:

- Gain additional vocabulary development
- Develop and utilize listening skills
- Begin to clarify values
- Become aware of a process for ranking

(10 min.) Phase one

Place on the board the following list of traits:

1. honest
2. good sport
3. happy
4. smart
5. clean
6. cooperative
7. dependable

Be sure to only read the list and do not interpret any meanings for the children. The directions are (using my numbers) to rank the list of traits I have provided. Do this activity by yourself. Student's list may look like this:

2. good sport
4. smart
3. happy
1. honest
7. dependable
6. cooperative
5. clean

(10 min.) Phase two

Tell the children to find one other child they would like to share their list. Let them pair themselves off naturally. Tell them you are allowing 5 minutes for each of them to explain the reasons for their ranking.

(10 min.) Phase three

Instruct student to get into groups of five. They have the task of appointing a recorder and a convener. Once again, natural selection should occur rather than lining off or having teacher composed groups. By consensus, each group is to come up with a rank order of the traits. When agreement has been reached, they are to place their ranking on the graph on the board.

Example

BEST COPY AVAILABLE

Groups

1	2	3	4	5
4	4	4	3	3
1	1	3	4	4
2	3	1	1	2
3	2	2	7	1
5	7	5	6	7
6	5	7	5	6
7	6	6	2	5

Phase Four

(60 min.) This part of the activity can probably be done the next day. Allow each group to explain the reason for their ranking. Then carry out an open class discussion about the similarities and differences of groups.

NOTE: Be sure to tell yourself 100 times the night before starting this last phase, "I will not pass judgment or place my values on the students decisions or discussions."

BEST COPY AVAILABLE

INSTRUCTIONS: You are a member of a space crew originally scheduled to rendezvous with a mother ship on the lighted surface of the moon. Due to mechanical difficulties, however, your ship was forced to land at a spot some 200 miles from the rendezvous point. During landing, much of the equipment aboard was damaged and, since survival depends on reaching the mother ship, the most critical items available must be chosen for the 200 mile trip. Below are listed the 15 items left intact and undamaged after landing. Your task is to rank order them in terms of their importance for your crew in allowing them to reach the rendezvous point. Place the number 1 by the most important item, the number 2 by the second most important, and so on, through number 15, the least important. You have 15 minutes to complete this phase of the exercise.

- _____ Box of matches
- _____ Food concentrate
- _____ 50 feet of nylon rope
- _____ Parachute silk
- _____ Portable heating unit
- _____ Two .45 calibre pistols
- _____ One case dehydrated Pet milk
- _____ Two 100 lb. tanks of oxygen
- _____ Stellar map (of the moon's constellation)
- _____ Life raft
- _____ Magnetic compass
- _____ 5 gallons of water
- _____ Signal flares
- _____ First aid kit containing infection needles
- _____ Solar-powered FM receiver-transmitter

NASA EXERCISE GROUP WORKSHEET

BEST COPY AVAILABLE

INSTRUCTIONS: This is an exercise in group decision-making. Your group is to employ the method of Group Consensus in reaching its decision. This means that the prediction for each of the 15 survival items must be agreed upon by each group member before it becomes a part of the group decision. Consensus is difficult to reach. Therefore, not every ranking will meet with everyone's complete approval. Try, as a group, to make each ranking one with which all group members can at least partially agree. Here are some guides to use in reaching consensus:

1. Avoid "conflict-reducing" techniques such as majority vote, averaging, or trading, in reaching your decision.
2. View differences of opinion as helpful rather than as a hinderance in decision-making.

_____	Box of matches
_____	Food concentrate
_____	50 feet of nylon rope
_____	Parachute silk
_____	Portable heating unit
_____	Two .45 calibre pistols
_____	One case dehydrated Pet milk
_____	Two 100 lb. tanks of oxygen
_____	Stellar map (of the moon's constellation)
_____	Life raft
_____	Magnetic compass
_____	5 gallons of water
_____	Signal flares
_____	First aid kit containing injection needles
_____	Solar-powered FM receiver-transmitter

RATIONALE:

CORRECT NUMBER

No oxygen	<u>15</u>	Box of matches
Can live quite awhile without food	<u>4</u>	Food concentrate
For travel over rough terrain	<u>6</u>	50 feet of nylon rope
Carrying	<u>8</u>	Parachute silk
Lighted side of moon is hot	<u>13</u>	Portable heating unit
Some use for propulsion	<u>11</u>	Two .45 calibre pistols
Needs H ₂ O to work	<u>12</u>	One case dehydrated Pet milk
No air on moon	<u>1</u>	Two 100 lb. tanks of oxygen
Needed for navigation	<u>3</u>	Stellar map (of moon's constellation)
Some value for shelter or carrying	<u>9</u>	Life raft
Moon's magnetic field is different from earth's	<u>14</u>	Magnetic compass
You can't live long without this	<u>2</u>	5 gallons of water
No oxygen	<u>10</u>	Signal flares
First aid kit might be needed but needles are useless	<u>7</u>	First aid kit containing injection needles
Communication	<u>5</u>	Solar-powered FM receiver- transmitter

The group recorder will assume the responsibility for directing the scoring. Individuals will:

1. Score the net difference between their answers and the correct answers. For example, if the answer was 9, and the correct answer was 12, the net difference is 3. Three becomes the score for that particular item.
2. Total these scores for an individual score.
3. Next total all individual scores and divide by the number of participants to arrive at an average individual score.
4. Score the net difference between group worksheet answers and the correct answers.
5. Total these scores for a group score.
6. Compare the average individual score with the group score.

RATINGS:

0-20	Excellent
20-30	Good
30-40	Average
40-50	Fair
over 50	Poor

PRINTED RESOURCES

and Media

Note to Teachers:

The items on the following pages were listed by our library aides as career education resources we now have in our media centers.

The list may not include all career education materials presently available, and no evaluation has been made to determine the relative merit of these publications.

These materials are listed so you may be aware of materials presently available. You are encouraged to review these materials and comment to the Director of Career Education on their usefulness.

Many of these items are also available in the Musser Public Library. The staff there has been especially helpful in assisting with the promotion of career education. We encourage you to enlist their services in our educational teamwork.

ADDITIONAL CAREER EDUCATION RESOURCES

The books, kits, guides, and other materials in this section have been reviewed by the Career Awareness Committee and are recommended for selection at the building level. No priority rankings were assigned so materials have been listed alphabetically by supplier's name.

The review process involved an extensive survey of materials available to date. Items may have been omitted from this section for either of two reasons:

1. The committee did not obtain copies for evaluation (either because evaluation copies were unavailable or because we were not aware of the availability of materials).
2. Several commercially available units were rejected either because the committee felt that they were of little value or because the materials were not in harmony with our career awareness philosophy.

Further information may be obtained about material selection by checking with a member of the career awareness committee or with the Director of Career Education.

Each school is encouraged to select career awareness materials for their own media center. Through the courtesy of Central State Bank we will have one of the SRA "Focus on Self Development" kits for circulation in the district. This kit is only one of several which appealed to the committee. We're not promoting SRA. Arrangements will be made with each building principal to schedule the kit at your building. As each of you has a chance to use the kit, a letter of thanks would undoubtedly be appreciated by Central State Bank.

AN ASSESSMENT FOR A TOTAL CAREER EDUCATION PROGRAM

Introduction

This assessment has been developed to provide this district a means of determining the status and needs of our career education program. This assessment has been designed to provide an overview of key elements in career education in a brief period of time.

Outcomes

The outcomes from using this document should provide a district with:

- data to make decisions
- awareness of assessment and planning
- insights into program development
- a realistic utilization of resources
- a team who will be aware of the need for assessment and planning
- information about other program concerns
- a system for continual program development
- an understanding of the process of assessment
- an insight to the occurring infusion of career education concepts
- improved communication among staff and administration regarding career education

Directions for Completing Profile

Assigned assessments are on a zero to five scale (see page 6), a rating of zero indicating nonexistence and a rating of five being ideal. Each criteria within an element is assessed at each instructional level, awareness, exploratory, and preparatory. The ratings at each instructional level within an element are summarized by adding the assigned assessments and dividing the sum by the number of criteria within the element.

The summarized result is the value arrived at for the element at each instructional level. The values for each element are then transferred from the element assessment sheet to a profile sheet (see page 4). A district profile can be developed by averaging assessment ratings for each instructional level.

Faculty Responsibilities

Teachers and administrators provide an internal assessment of the career education program. Faculty members record their responses on pages 6 through 16. The information which will be placed on pages 3 through 5 will be computed and entered at the central district office. This instrument is in no way connected with the evaluation of teacher performance, so do not include your signature or other identifying marks.

Consulting Team Responsibilities

A team of consultants will be asked biannually to use this instrument and indicate their impressions of the career education programs. This team will be composed of persons who are not employed by the district. The team will be selected by the Director of Career Education, the Career Education Advisory Council, and faculty committees representing career awareness, career exploration, and career development. Membership on the consulting team may include, but not be limited to; teachers from other school districts, career education advisory council members, career education directors from other districts, state department consultants, students, and college or university staff members. Consulting team members record their responses on pages 6 through 16.

Awareness K-6	Exploratory 7-9	Preparation 10-12
<u>Assessment Criteria</u> A. Staff members are properly trained to carry out their functions in the career education program. B. Coordination and/or direction is provided for each part of the career education program. C. The student-teacher ratio allows for quality education. D. Staff members have been prepared for their program level. E. Staff members have been prepared to integrate career education into their instructional program.	5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0	5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0
Assessment of Personnel		
3. ELEMENT - ADVISORY COUNCIL - ADVISORY COMMITTEES (Faculty Committees are not assessed in this section) <u>Philosophy</u> - Career programs need to reflect the occupational world and community needs. Advisory groups are relied upon to assist in planning and keeping programs current to the requirements of the world of work. <u>Assessment Criteria</u> A. An overall career education advisory council is functioning. B. Committees for each vocational area are functioning. C. Staff responsibility is designated for each advisory committee. D. Teachers attend advisory meetings as resource persons and are welcome as observers. E. Duties and responsibilities of advisory groups are outlined in writing and are being followed. F. Different levels of personnel from key occupations are represented in advisory groups. G. Broad community representation exists.	5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0	5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0 5 4 3 2 1 0
Assessment of Advisory Council		

ELEMENT - CURRICULUM

Philosophy - The curriculum should reflect the activities of business and industry and allow each student to develop career interests and abilities.

Assessment Criteria

- A. Each career education program has a written philosophy.
- B. Each career program has a written course of study with measurable expected student outcomes.
- C. Staff time is provided for planning and upgrading career programs.
- D. Community resources are being utilized in instruction.
- E. District curriculum guides are utilized as a basis for program articulation.
- F. Interdisciplinary activities are functioning between career and basic-general education.
- G. Students are exposed to self in relation to work.
- H. Students are exposed to work in relation to the community.
- I. Students are exposed to broad families of occupations.
- J. Learning experiences represent a cross-section of the world of work.
- K. Students are allowed to observe workers and work processes.
- L. Teachers are involved in planning career education programs.
- M. Students are allowed to explore several preparation areas.
- N. Students are allowed to experience work environment.
- O. Students are encouraged to select a broad career preparation goal appropriate to their interests, abilities, and aptitudes.
- P. Exploratory programs provide hands-on experience.
- Q. Effective and extensive use is made of business and industry for exploration through selected work experience and observation.

Assessment of Administration									

GLOSSARY

Advisory committee:	A group, usually from outside the field of education with current and substantial knowledge of jobs and occupations, selected to provide advice on technical matters for various career education programs.
Assessment:	A survey of the present condition of the total career education program.
Career development tasks:	Sequential steps necessary to insure each student orderly progress toward a career goal. (Examples of career development tasks: (a) developing a positive concept, (b) understanding the decision making process, (c) acquiring knowledge and skills in occupations and work settings.)
Career guidance:	That process which affords each student the opportunity to complete his career development tasks.
Community resources, facilities, equipment:	Those human and physical assets within the community that provide assistance to the school in carrying out their educational programs.
Evaluation:	A process within the system that measures whether the predetermined objectives of the career education programs are being met.
Individualized instruction:	A delivery system that allows each student to acquire knowledge, skills, and abilities in keeping with predetermined objectives without regard to a timeline.
Interdisciplinary:	Activities which involve two or more disciplines that show the relationship and application of common competencies.
Key occupation:	Occupations that are representative of the community or segments of the labor force in respect to numbers employed and required competencies.

Long-range plan:

The career education developmental plan that is required by State law to be filed with the State Department of Education. It must have been approved by the district school board prior to submittal to this agency.

Staff competencies:

Knowledge, abilities, attitudes, and skills needed by the staff to operate a quality career education program.

Student outcomes:

Pupil performance in terms of predetermined objectives.

Work-Experience:

Activities of a student learner in a work environment that are supervised jointly by the school and the cooperating training agency.
